

CALL FOR ABSTRACTS:

Hydrogen & Fuel Cell SUPERGEN Researcher Conference, University of Birmingham, midday Monday 15th - midday Wednesday 17th December 2014.

The UK's first inclusive Hydrogen and Fuel Cell Research Network, H2FC SUPERGEN is delighted to call for abstracts for our annual 'Researcher Conference'. Following the success of this event last year, the conference aims to provide a platform for PhD students, PDRAs, and early career researchers / academics to present their work through talks and poster sessions, alongside leading academics, and industrialists working in Hydrogen and Fuel Cell research.

The conference will take place at the University of Birmingham, the heart of the Centre for Doctoral Training on Fuel Cells and their Fuels, and there will be a chance for attendees to visit associated labs. Alongside the talks and posters, there will be networking drinks and a conference dinner.

We ask PhD students, researchers, academics, industrialists to provide half to one page abstracts for the conference detailing their research and giving an overview of the results they wish to present to Dr Chloe Stockford at h2fcsupergen.conf@imperial.ac.uk by **Tuesday 11th November 2014**. Please indicate your preference for an oral or poster presentation.

In-line with the ethos of H2FC SUPERGEN, the conference endeavours to bring together the entire Hydrogen and Fuel Cell research community. With this in mind those we very much encourage attendance from PhD students, PDRAs, early career researchers, academics, industrialists and those working in government/policy across the field of Hydrogen and Fuel Cells. The conference will provide an excellent chance to network within the community.

The cost of attending the conference is £50 for a student and £150 for a non-student. This includes conference registration, lunches and refreshments throughout the conference, networking drinks and the conference dinner on Tuesday December 16th. It does not include the cost of accommodation which must be booked independently. Students can register for the conference here: www.h2fcsupergen.com/student-registration/and non-students can register here: www.h2fcsupergen.com/non-student-registration. The deadline for registration is **Friday 21st November 2014**. Please note that places are limited so early registration is advised.

Accommodation will be available at the University of Birmingham. A number of rooms have been reserved. Please visit www.venuebirmingham.com/sleep to reserve your accommodation before 14th November 2014. You can use the code **H2FC** to receive discounted rates of £45 per night for single and £65 per night for double B&B accommodation.

The H2FC SUPERGEN Hub has now grown to over 450 members including a Science Board of around 90 UK-based academics working in the field, an Advisory Board comprising 20 partners from industry and government, a Management Board of 10 academics, and around 350 Associate Members. For more information on the Hub, and/or to register your interest, please visit www.h2fcsupergen.com or email h2fcsupergen.conf@imperial.ac.uk.
